2 September – 15 September 2026

The Association for Overseas Technical Cooperation and Sustainable Partnerships [AOTS]

1. BACKGROUND OF THE PROGRAMS:

The Association for Overseas Technical Cooperation and Sustainable Partnerships (AOTS) is an organization for human resources development mainly in overseas countries to promote technical cooperation through training, experts dispatch and other programs. Through those programs, we aim at contributing to the mutual economic growth of developing countries and Japan as well as enhancing friendly relations among those countries.

AOTS was established in 1959 with the support of the Ministry of International Trade and Industry (which is the present Ministry of Economy, Trade and Industry: METI) as Japan's first technical cooperation organization on a private sector basis. More than 200,000 individuals from 198 countries and regions have undergone our training in Japan, while the cumulative attendance at our overseas programs till the end of fiscal 2024 exceeded 240,000.

AOTS organizes and develops a various range of training courses based on requests from returning participants and industry in developing countries.

The Executive Program on Corporate Management (EPCM) is one of AOTS's flagships and has been the most popular course to learn corporate management philosophy, theories, and skills together with their underlying ways of thinking. Since its establishment in 1983, this course has been continuously conducted to improve the managerial capabilities of corporate executives in developing countries. This course is designed for executives and use the case method to examine decision-making based on actual cases, from an executive perspective. Through dialogue among participants, it aims to enhance the thinking skills necessary for corporate executives to make effective decisions.

2. COUNTRY:

Please refer to "[Appendix 4] List of Target Countries and Regions" of this program outline.

Those who reside in the countries listed in the table and are recommended by AOTS's Overseas Collaborative Organization or able to apply from a Japanese company located in Japan may apply.

3. NUMBER OF PARTICIPANTS:

14 participants

4. PARTICIPATION REQUIREMENTS:

- (1) Participants should be, in principle, director-level senior executives who have overall responsibility for their organizational management.

Notes:

- (2) Family members or business partners (colleagues/subordinates of the participant's company) are not allowed

to accompany participants on their journey in Japan.

Preferential Selection:

- (1) Participants from Japanese companies, business partners of Japanese companies, companies planning to deal with Japanese companies are most desirable. (In the case of applications from Japanese companies, business partners of Japanese companies, companies planning to deal with Japanese companies, the priority for selection becomes higher.)

- (4) The number of participants from the same host company in Japan or the same sending company from overseas may be limited if there are more applicants than AOTS can accept.

5. OUTLINE OF THE PROGRAM:

- OBJECTIVES

The objective of the program is to enhance the thinking skills necessary for corporate executives' decision-making, thereby upgrading the quality of the management of their companies.

- KEY BENEFITS

- (1) Using cases of Japanese and/or non-Japanese companies, participants will deeply consider how they would handle the situations described in the case if they were the executives of those companies. Through peer dialogue led by the instructors, participants will broaden their perspectives as corporate executives, thereby improving their thinking skills.
- (2) Participants will strengthen decision-making skills regarding specific management issues such as corporate philosophy, management policies, corporate and competitive strategies, corporate ethics, marketing, and human resources management.

- EDUCATIONAL METHODOLOGY

The most distinctive feature of EPCM is that all classes are conducted not through one-way lectures, but through peer dialogue among participants to develop their thinking skills, using the so-called case method. Participants will read cases of Japanese and foreign companies selected by the instructors. Participants will then discuss in small groups how they would think if they were the executives of those companies regarding the issues pointed out by the instructors, to prepare for the class where all participants will participate. The instructors will throw out questions to initiate dialogue and start the class. Participants, as executives of the company, engage in ongoing dialogue, earnestly expressing their opinions and working toward the most appropriate decisions, guided by the experienced instructor's facilitation. All EPCM participants who have experienced this case method have highly recommended it as the most effective approach for strengthening the thinking and decision-making skills of executives.

Course Design (Steps of the Course)

[Step 1]

Participants will first share their definition of "Japanese Management", based on their own perspectives and experiences, and sort out its strengths and weaknesses. Then, through facilitated class discussions with the instructor and among peers, they will identify the unique values, mindsets, and practices that can enhance their own capabilities and knowledge.

[Step 2]

While developing their thinking skills, participants will deepen their understanding of corporate philosophy, management policies, corporate and competitive strategies, corporate ethics, marketing, and finance through case method discussions. Company visits will allow participants observe actual management practices at Japanese companies and provide opportunities to exchange their views with the business leaders and corporate executives.

[Step 3]

Through these steps, participants will reaffirm their roles as business leaders committed to enhancing the management quality of their own companies.

[Step 4]

On the final day, participants will be divided into groups to present their ideas on the "possibilities of desirable management" based on what they have learned through EPCM. After listening to the perspectives of other groups, they will receive feedback from the Course Director and the Associate Course Director.

The typical daily schedule consists of a two-hour morning class session and a two-hour afternoon class session.

*For the EPCM program, it consists of a total of 6 hours, including a one-hour small group session and a two-hour class session, both in the morning and in the afternoon.
